

Hi Lamba ☺

I saw your demo now

I just have a few advices:

You should make more farms, 4 it is not enough. More farms means that cows can re-create faster and you can have more at the same time.

You should make at least 6 before min 12-13 and later in game you can have a circle of 10 farms or more.

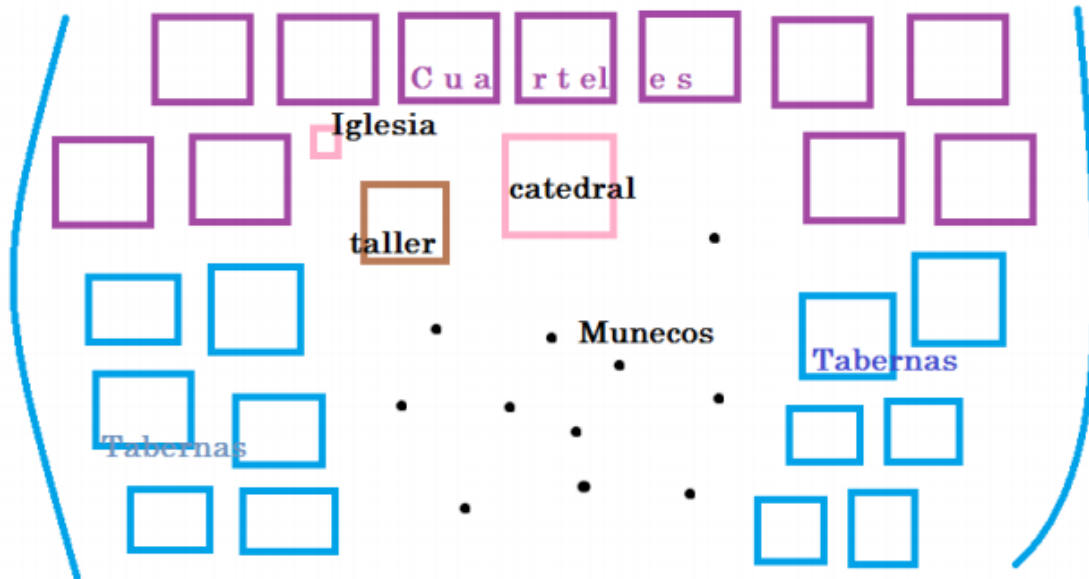

See for example a circle below. Here min 15, there are 9 farms.

2. How to organize your base

See below a tip how to better organize your front.

You should have barracks behind (barracks-cuarteles) and taberns at the sides. In the middle cathedral church and lab to make ballists. A high number of barracks means that you can recreate faster troops

3. Try to start with farm before making stone. I think it can give you more food than usual
